Chapter- 2

India--Location and physical division

Introduction

India is situated in the north of the equator from latitude 8.4' north to 37.6' north and between longitude 68.7' east and 97.25' east. In this way it is located entirely in the Northern hemisphere or Eastern hemisphere. On this basis we can say that India is situated approximately in the centre of the Eastern hemisphere.

Explanation

* Deccan Plateau

* East Coastal Plains and the west coastal plains

* Himalayan ranges

Physical division of India
